CHARLESTOWN WHARF

When the General Assembly of the Province of Maryland enacted a law in 1742 to build a town at Long Point on the North East River—a town to be called Charlestown—it also enacted a law to build a wharf at the same site. The wharf extended 300 feet out into the river and was wide enough for the passage of three wagons. It was built of heavy log cribbing, filled with stones not native to this area, which were probably brought in as ship ballast. In addition to the wharf itself, there stood here an inspection house for inspecting and grading flour before it was shipped. Grains were stored in a massive stone warehouse, three stories high, eighty feet long with first floor walls 36 inches thick. During the Revolutionary War, Charlestown was a supply depot for the Continental Army. At that time, supplies were stored in the warehouse and were brought to Charlestown by ship and barge from the southern part of the state.
